A systematic review and analysis of published studies found consistent links between inflammatory arthritis and impacts on intimacy and sexual function for both men and women. The Arthritis Care & Research analysis included 55 studies.

People living with inflammatory arthritis demonstrated a higher prevalence of sexual dysfunction compared with other individuals. For both genders, disease-related factors—including pain, fatigue, and mobility restrictions—contributed to sexual dysfunction and reduced sexual desire.

Erectile dysfunction in men largely accounted for sexual dysfunction, while females experienced pressure to continue intimate relationships despite their sexual dysfunction, which caused stress in relationships for some people.

“Sexual health and positive relationships are key factors in a person's general sense of wellbeing, yet these issues are not routinely dealt with in practice. Our data suggest that consideration of the impact of inflammatory arthritis on sexual health and intimacy may be important for the holistic management of people with inflammatory arthritis,” said senior author Dr. Andrew Briggs, of Curtin University, in Australia.

**Additional Information**

**About Journal**

Arthritis Care & Research, an official journal of the American College of Rheumatology and the Association of Rheumatology Health Professionals (a division of the College), is a peer-reviewed publication that publishes original research, review articles, and editorials that promote excellence in the clinical practice of rheumatology. Relevant to the care of individuals with rheumatic diseases, major topics are evidence-based practice studies, clinical problems, practice guidelines, educational, social, and public health issues, health economics, health care policy, and future trends in rheumatology practice.

**About Wiley**

Wiley is a global leader in research and education. Our online scientific, technical, medical, and scholarly journals, and our digital learning, assessment, certification and student-lifecycle services and solutions help universities, academic societies, businesses, governments and individuals to achieve their academic and professional goals. For more than 200 years, we have delivered consistent performance to our stakeholders. The Company's website can be accessed at [www.wiley.com](http://www.wiley.com).
