A review of published studies found that estimates for the global prevalence of erectile dysfunction vary widely, ranging from 3% to 76.5%. The findings are published in BJU International.

A review of published studies found that estimates for the global prevalence of erectile dysfunction vary widely, ranging from 3% to 76.5%. The findings are published in BJU International.

The variation may reflect differences in study population ages and different definitions and assessment methods of erectile dysfunction.

Erectile dysfunction was linked with increased risks of cardiovascular disease, dementia, and early death.

The authors noted that early detection of erectile dysfunction may help improve quality of life in affected men, and also indicate when interventions may be warranted to prevent cardiovascular disease and early death. “Due to the sensitive nature of the topic, physicians should consider screening for erectile dysfunction in at-risk patients, as information may not be volunteered,” they wrote.

About Journal

BJUI aims to provide the very highest standard of research and clinical information for the urological community, promoting awareness of new advances and supporting best practice in urology.

BJUI publishes original articles, reviews, comments and educational articles on all aspects of urology. Clinical relevance is critical and the journal covers the entire breadth of urology under the following sections: Comments, Reviews, Epidemiology, Research Correspondence, Urological Oncology (all areas of urological oncology as well as recent advances in diagnostic techniques), Robotics and Laparoscopy, Upper Urinary Tract, Functional Urology, Andrology, Translational Science, Professional Innovation and Step-by-Step.

About Wiley

Wiley drives the world forward with research and education. Our scientific, technical, medical, and scholarly journals and our digital learning, certification, and student-lifecycle services and solutions help students, researchers, universities, and corporations to achieve their goals in an ever-changing world. For more than 200 years, we have delivered consistent performance to all of our stakeholders. The Company’s website can be accessed at www.wiley.com.
